### INTRODUCTION

W.A.T.E.R Project was initiated in 2007 by SPARK Foundation, in partnership with the Global Environment Centre (GEC). Water Stewardship Agenda is third phase of W.A.T.E.R. Project that focuses on Sungai Penchala, a tributary of Sungai Sungei Way, Sungai Klang and Sungai Selangor.

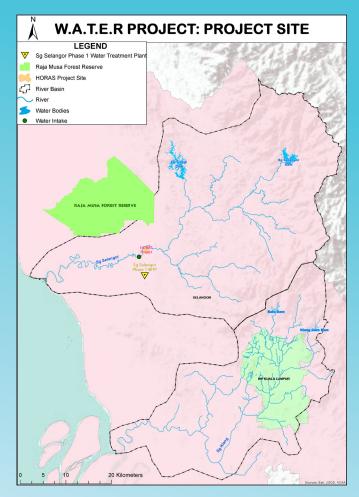

## **OBJECTIVES**

- To continue Sungai Penchala River Education Programme (Including Sungei Way)
- To empower targeted group on water stewardship
- To encourage participatory approaches in river basin projects by relevant government agencies
- Reduce stress on our water resources.

## CIVIC SCIENCE APPROACH

Emphasized in creating awareness, providing knowledge, and empower community stakeholders with water conservation related skills and actions.

# INITIATIVES

### WATER FOR WATER

Harvesting Systems

Clay Dyke

#### WATER FOR QUALITY WATER

Water Source

Constructed Wetland Cell

## SELANGOR RIVER BASIN...

Sungai Selangor has 7 major tributaries.

Raja Musa Forest Reserve (35,656 hectares), part of North Selangor Peat Swamp Forest (81,304 hectares) in northern Selangor is an important water source for Selangor River Basin.

## KLANG RIVER BASIN...

Penchala river is 14 km (80% channelised) in length, flowing from Bukit Kiara hill in Kuala Lumpur and with ±290.3 km² catchment area.

**Sungai Way** is 2 km in length and flows into Penchala river before the river meets Klang River.
